

Do you take opioids for chronic pain?

We want to understand why you may or may not have accessed naloxone - including what makes it easier or more difficult to access - among individuals with past or current experience taking opioids for chronic pain in order to improve naloxone policies and programs.

PARTICIPANTS

Ontario residents 18 years or older with past or current experience taking opioids for chronic pain management.

INVOLVEMENT

One-hour telephone interview to understand people's perspectives and experiences with naloxone. Participants will be compensated for their time. Further details here:

ABOUT US

The Ontario Drug Policy Research Network (ODPRN) is a team of researchers who work with a variety of groups within Ontario to research drug safety. One of our core areas of research is the safe use of opioids.
